Ksenija, this will be a sand/ rubber system. I also followed up on another point that was raised on the phone call regarding truck tires. The STC guidelines allow semi trucks. The "truck tires" that are not used in fields are OTR or off road trucks and vehicles. This may clarify the question about Entech and clear up the confusion on this issue . Sprinturf's primary supplier is CRM who has separate lines for domestic cars/light trucks and SUV's and we therefore use these tires in our fields . However, the industry testing shows no difference between semi trucks and cars/light trucks. ECORE has some fairly extensive data on this. I understand u visited their facility recently and may already be up to speed on this issue. However, I wanted to make sure we closed the loop from the phone call.

Regards,
Rom

Hi Rom,

We are starting to schedule visits to observe field installations. Our idea is to see the infilling of one sand-crumb rubber system and one pure crumb rubber system. I was wondering what kind of a system will be used in your installation coming up in the Philly area?

Thank you,

Ksenija

Ksenija, please give me some times Thursday 28th or Monday 2nd and we can set up a time. I will also have my Exec VP in charge of national installs Bruce Cheskin on the call to answer any detailed questions. On the field visit issue, the only thing we have somewhat close to you in the time frame you discussed is an install in the Philly area late May/ early June. Will that work. I will have more options when we get into heart of install season in late June/ July and August.

Rom,

Another thing to look from me, if you are available, is a set of proposed times for a detailed call on field installation and maintenance. I know we talked to you a bit in the meeting with the synthetic turf industry, but since that meeting covered a lot of different topics, it would be beneficial to dedicate some distinct time to the installation and maintenance practices, too. Would you be available for such a call?

Best,

Ksenija

Subject: Field installation

Hi Rom,

Thank you for your visit to EPA on March 22. I wanted to follow up with you on your invitation to observe a field installation. Would you happen to have an installation planned for the second half of May? Something more local to Washington DC is preferable to us, but this really depends on Sprinturf's installation schedules.

Looking forward to hearing back from you.

Best regards,

Ksenija
